The Enquirer man has discovered a strange puenomenon in the way of a "witch," who, he asserts (and we think believes), has taken up her abode in a house "No. I kiddle street." The old woman in that house has fearful dreams, and in her dreams sees horrible objects, such as feather-covered babies, rats, base balls, &c., all full fledged. This is strange, indeed, and were it not that the discovery had first been made by the "infallible" of the Enquirer we would doubt the credibility of the story. What will next rack the brain of this poor fellow is hard to tell.
